## Smart Asset Management

Features: Barcode tracking, temperature & humidity monitoring, predictive maintenance

- Benefits:
- Reduces equipment downtime
  - Increase productivity and efficiency
  - Track asset location and service records
  - Wireless location zoning check-in
  - Easy to locate components for maintenance

60°C 40°C 20°C 5°C

## Climate Monitoring System

Features: IoT temperature and humidity sensors with real-time environmental alerts

- Benefits:
- Constant temperature, humidity monitor & alert
  - Alert to SMS, email and Mobile App
  - Temperature color-coded mapping
  - Motion Sensing is supported
  - Device data lookup using QRcode

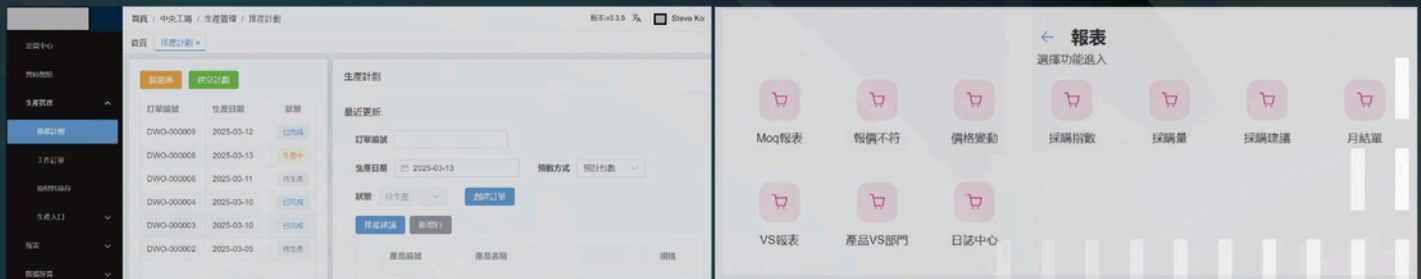

# Integrated Order & Contract System

Features: Digital procurement, supplier collaboration, paperless cost logging.

Benefits:

- Single system for inside and outside suppliers
- Digital invoice in the cloud to save storage space
- Pricing alert with price difference
- Real-Time daily cost data report
- Ordering restriction and update in real-time
- QR Code to trace raw material information for food safety

## Cost Management

Features: Automated price comparison, raw material usage reports, abnormal price alerts.

Benefits:

- Alert cost change from suppliers in real-time
- Pricing report in details anytime
- Data export for offline analysis
- Optimize future procurement planning
- Third party applications (HRMS, ERP, FLEX) API is supported

## Cloud & Security

**Features:** Private cloud storage, data encrypted.

**Benefits:**

- Digital data securely stored and encrypted in cloud
- Easy to search record and data
- Provide data source for AI machine learning
- Save tremendous space for paper records for future legal matter
- Effortless to transfer and consolidate data

# AI

## Future Artificial Intelligence is just right the corner

### Procurement AI Agent

- Centralized ordering system managed via costing agent

### Inventory AI Agent

- Provide inventory/purchase order information

### Supply Chain AI Agent

- Direct online orders from customer
- Logistics and order shipments planning automatically

### Self-Learning AI Agent

- AI-core self-learning (AGI/ML)
- LLM to executable command line for procurement
- Voice activated command for task execution
